**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moslehi (US5405444) in view of JP63-166219.

Moslehi discloses a heat treatment apparatus for irradiating a substrate comprising a light source (84), a chamber (16) below the light source, a holding member (22), a light shield/liner (62) in chamber to block light from reaching a metal surface in chamber, shield/liner is quartz (abstract), walls (42) are metallic (column 8, lines 39-41), and shield is tubular and covers/seals wall surfaces (column 8, lines 42-51). Moslehi does not disclose a plurality of flash lamps and an assist heating means. JP63-166219 discloses a plurality of flash lamps (17) and an assist heating means(14). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have replaced the tungsten-halogen lamps of Moslehi with the flash lamps of JP63-166219 and to have included the assist heating means of JP63-166219 in the apparatus of Moslehi because, flash lamps and an assist heating means allow the substrate to be uniformly heated.

Moslehi in view of JP63-166219 discloses the claimed invention except for a shield/ liner with a roughened surface. It would have been obvious to one of ordinary skill in the art at the

time the invention was made to have included a roughened surface as a means to enhance the shielding effect of the liner/shield.

*Conclusion*
